# About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

## Disclaimers

### Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

### Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

SLS 1	CORE	N/A	N/A	PUBLIC	Senior Leadership Statement	GENERAL

#### Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

Responsible investment is part of our DNA. We are convinced that ESG practices will improve our investment ecosystem and enhance investors' returns. It also forms part of our fiduciary duty in a context where our investors actively work to align their financial and sustainability objectives. It is Nexxus' investment belief that incorporating social, environmental, and good corporate governance (ESG) factors in our investment theses and the management of our portfolio companies contributes to value creation. We also believe it is an effective way to manage and mitigate risks in our investment activity.

We understand that acting as responsible investors is a gradual process of incorporating best practices and a process of continuous improvement to which we are committed.

We believe our activity must actively contribute to achieving the Sustainable Development Goals (SDGs), and we are working and investing resources to align our actions to make this possible. We believe our contributions are strongest to Gender Equality (SDG 5), Decent Work and Economic Growth (SDG 8), Reduce Inequalities (SDG 10), and Climate Action (SDG 13).

In our investment processes, we aim to comply with best global practices as responsible investors. We have made our commitment to responsible investment public by adhering to the United Nations Principles for Responsible Investment.

During 2022, we developed a responsible investment methodology that applies to the entire investment cycle.

To provide an adequate response to the commitments assumed as a responsible investor, we believe it is necessary to have an adequate ESG governance structure. For this: (i) we provide training to investment teams in ESG matters, and (ii) we have senior team members in both México and Spain in charge of the execution of our ESG strategy.

Regarding our engagements on climate, fact-finding engagements can include pushing companies for better disclosure or an attempt to better understand the capex/opex implications of carbon emission reduction targets.

Engagements may involve more contextual situations whereby we urge changes in capital allocation, strategy, or governance. We believe both types of corporate engagement address climate risks or opportunities and simultaneously unlock shareholder value.

Climate change is addressed within our ESG strategy and, in particular, through the work we do in integration, engagement, advocacy, and investment solutions.

Our approach to climate change is closely aligned with the PRI Investor Agenda. This initiative allows investors to showcase their contribution to transitioning capital to low-carbon opportunities. It encourages them to take action across four areas: investments, corporate engagement, investor disclosure, and policy advocacy.

- ESG in the investment process: integrating ESG issues into the Investment process, including due diligence and management practices as appropriate.
- Value creation: working with portfolio companies to strengthen ESG performance and drive value.
- Promoting transparency through ESG-related disclosures and cross-industry collaboration to adopt best practices.

We also provide regular and transparent ESG information to our investors and stakeholders by completing the annual UN PRI Transparency Report.

In 2023, we published our first sustainability report in line with TCFD Methodology and SASB standards.

Looking forward, we know we must keep making the necessary efforts to further advance in integrating climate-related risks and opportunities into our processes.

We anticipate this will include ongoing training and education and the developing of new tools and resources. We also recognize that our industry still has a lot of work to do to integrate climate change into governance and decision-making.

We look forward to collaborating with and learning from peers on this topic and engaging in industry-wide efforts to drive even more responsible investing.

## Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
  - Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
    - refinement of ESG analysis and incorporation
    - stewardship activities with investees and/or with policymakers
    - collaborative engagements
    - attainment of responsible investment certifications and/or awards
- We conduct our first materiality assessment with our stakeholders.
  - Considering the results of the materiality assessment as the main input, we confirmed our alignment with SDG's, 5,8,10, and 13, and we established the strategic topics for Nexxus as a firm and for our portfolio companies.
  - We developed a responsible investment methodology applicable to our entire investment cycle
  - We developed the ESG due diligence questionnaire and started the application with the portfolio companies of the Private Debt Fund

## Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

We plan to achieve our portfolio's targets in emission reductions not through divestment but by engaging with our companies to reduce their emissions, increase their exposure to better practices, and boost transparency. We are still exploring the best metrics and targets to calibrate physical impact and geopolitical risk. However, we have analyzed where we may have concentrated risks from the perspective of physical impacts induced by a changing climate and related geopolitical implications. We expect this reporting and target-setting area to evolve as data improves and climate adaptation investment requirements emerge.

As part of our efforts, we incorporate TCFD-aligned questions in our due diligence processes, such as:

- An overview of the company's governance for managing climate-related risks and opportunities
- Whether the company has evaluated and disclosed how climate-related issues may affect its strategy, business operations, and financial planning over the short, medium, and long-term
- The processes the company uses to identify, assess, and manage climate-related issues
- The climate-related metrics the company monitors
- Disclosure of emissions inventory

During 2023, we published our first sustainability report in line with the TCFD and SASB, including the Initial calculation of GHG emissions for Nexus offices.
